# Who are we?

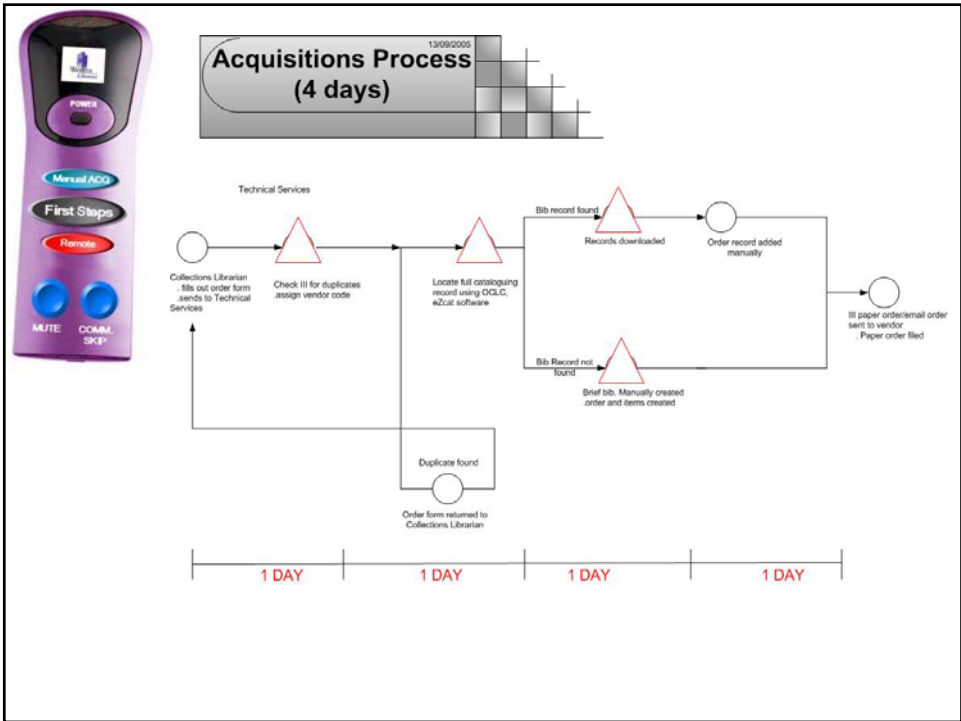

- University of Western Ontario, in London Ontario
- One of Canada's oldest universities
- Acquisitions Budget - \$11.4 million CDN
- 33,000 Undergraduate and graduate students
- ARL Library

# Agenda

- Manual ACQ process
- First Steps
- Remote Searching

## First Steps

- We benefit from a strong relationship with Coutts Information Services
- Coutts offers complete bib records

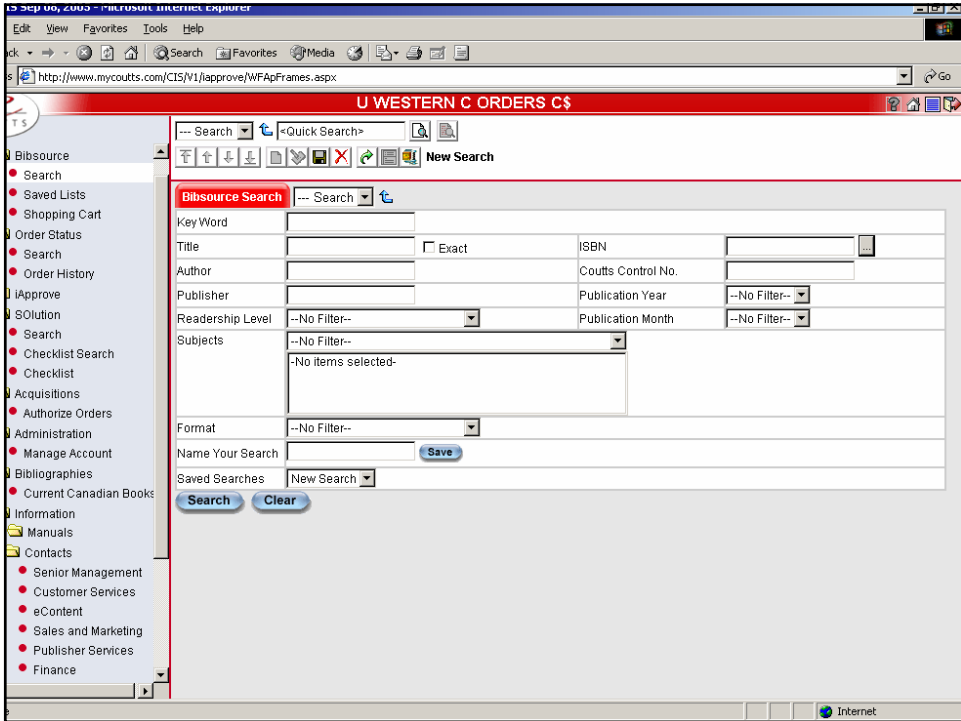

## First Steps

- Used Coutts' OASIS Database to retrieve bib. records only
- Implemented Millennium Data Exchange – allowed desktop loading of files (previously we ftp'd the files)

# First Steps

The image shows a purple handheld device, likely a barcode scanner or a remote control, with a screen displaying the 'Western Libraries' logo. The device has several buttons: 'POWER', 'Manual ACQ', 'First Steps', 'Remote', 'MUTE', and 'COMM. SKP'. To the right of the device is a bulleted list:

- May enter up to 200 ISBNs in this box

Below the list is a screenshot of a dialog box from the website 'http://www.mycoutts.com'. The dialog box is titled 'Press ENTER between each value' and contains a list of ISBNs: 0224051873, 0743250605, 0130974250, and 1593851545. The dialog box has 'Confirm' and 'Cancel' buttons at the bottom.

## First Steps - Summary

- 1 staff member now handles workload previously managed by 3 staff
- Reduced turn-around from 4 days to 1
- Requires either:
  - Load profile training; or
  - Innovative to create a new load table - \$\$\$; or
  - Innovative to edit an existing load table - \$\$\$

## First Steps - Summary

- Eliminated manual creation of our records (bib., order, and item)
- Full bib. records visible to patrons at time of ordering
- Improved record quality and accessibility

## Remote Searching

- Meeting with Coutts staff (Nov. 2004)
  - Suggestion that a Z39.50-compliant OASIS database would help streamline our process even more
- By April, 2005 OASIS was Z39.50-compliant

## Remote Searching

- Doesn't require Load Profile Training
- Doesn't require accessing the Coutts' OASIS database to download records
- Doesn't require uploading files using Millennium Data Exchange

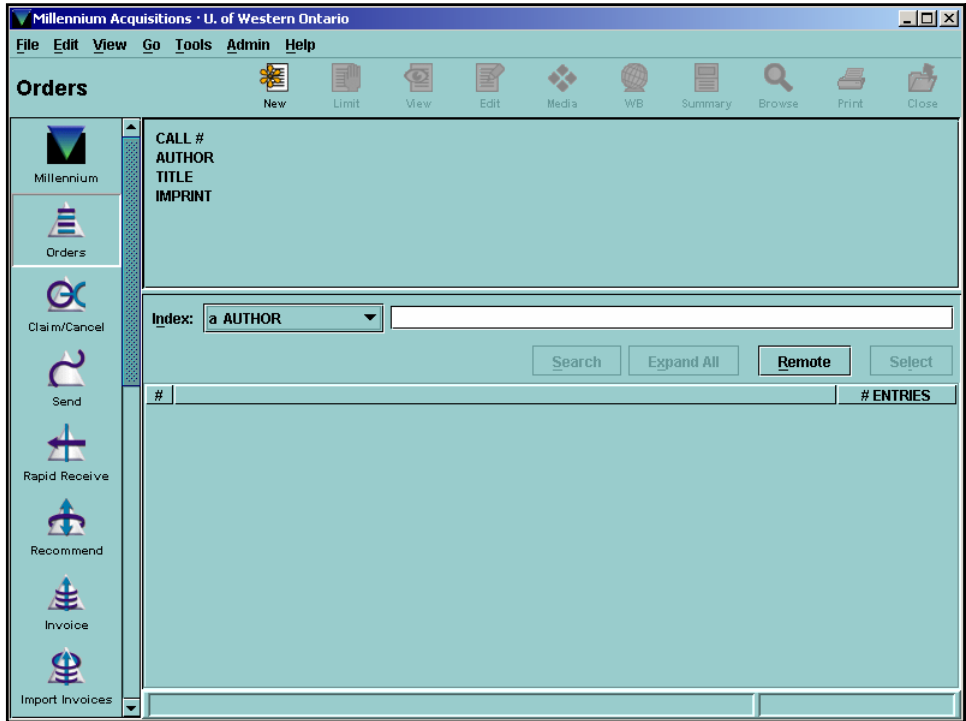

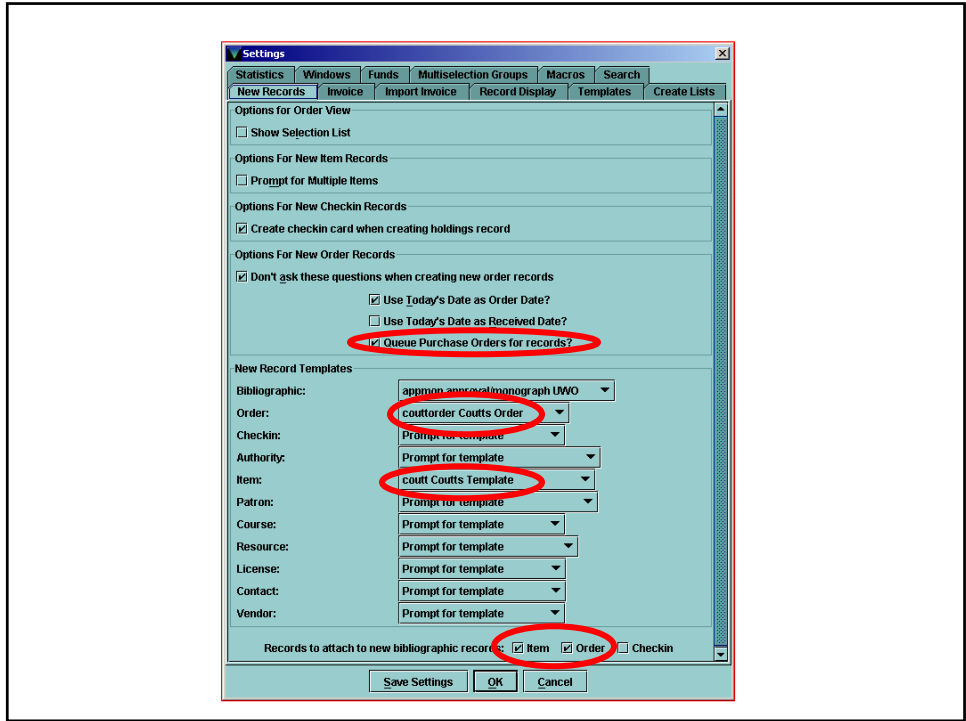

## Remote Searching

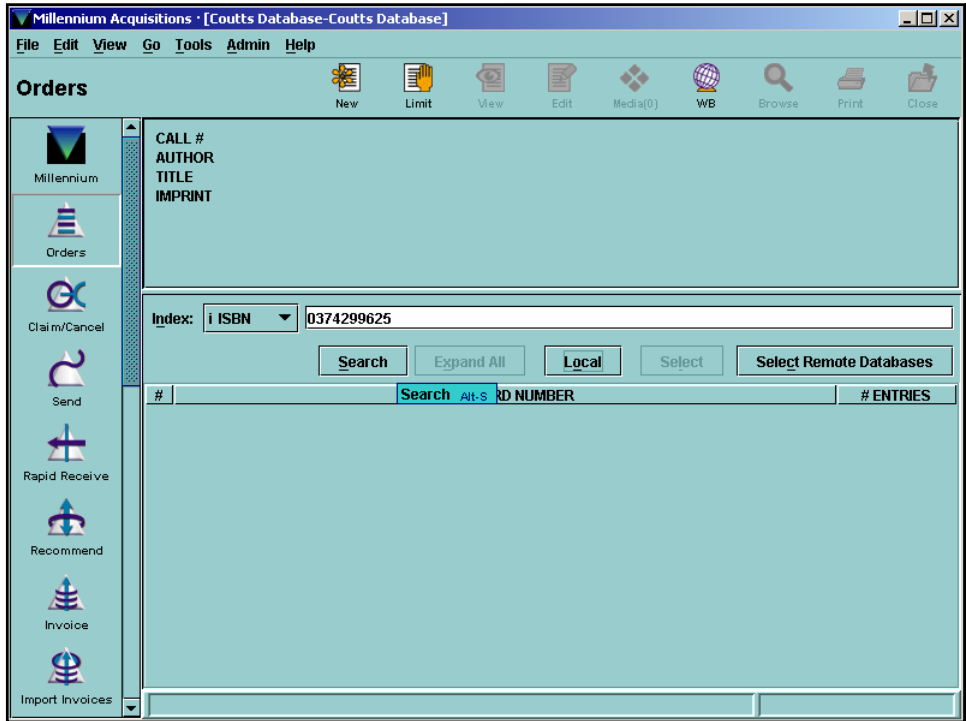

- 2 of our affiliated colleges (who share our database) are in full production
- Western Libraries – almost. . .

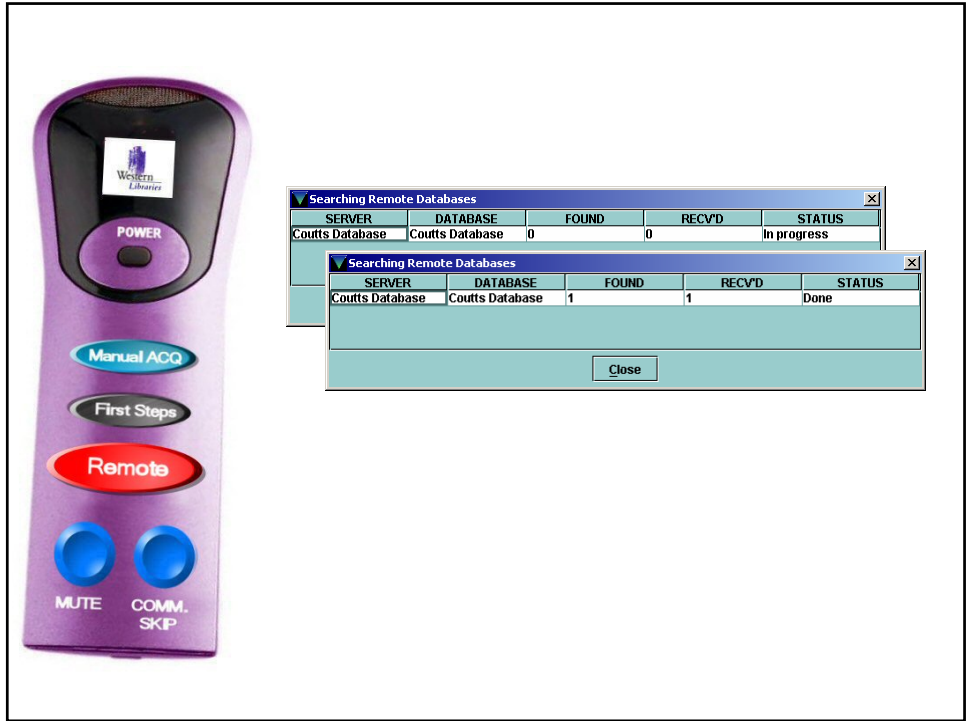

## Remote Searching

- Set our New Records “Settings” tab as follows. . .

The title duplication key is formed from the first letter of each of the first seven words of the normalized form of the field. If the field does not contain seven words, the key is padded with letters from the last word. If there are not enough letters in the last word, asterisks are used to complete the key.
